

# 7th World Forum on Breast and Cervical Cancer (WFBCC-2026)

(WFBCC-2026) October 29–30, 2026

## Tentative Scientific Program - Day 1

October 29, 2026 || 09:00 - 18:30 || Orlando, USA

**09:00 - 09:30**

*Registrations & Opening Remarks*

Eschendorf, USA – Exhibitor (*Life Science, Laboratory Instruments, Consumables & Solutions*) Exhibition Open Throughout the Day

**09:30 - 10:30**

### *Keynote Presenters*

**09:30 - 10:00**

**Point of Care Host Response Genomic Testing: Opportunities and Implementation Barriers for Early Sepsis and Infection Diagnosis in the Emergency Department**

*Dr. Yashwant Pathak, University of South Florida, USA*

**10:00 - 10:30**

**Dual perfusion of human placenta and validating medications for the pregnant patient**

*Dr. Mahmoud S. Ahmed, University of Texas Medical Branch, USA*

**10:30 - 11:00**

*Networking, Refreshment Break & Group Photo*

### Technical Session - I [11:00 - 13:00]

**11:00 - 11:25**

**What Works in Addiction Treatment and Recovery**

*Dr. John Hamilton, Liberation Programs, Inc, USA*

**11:25 - 11:50**

**Tumour Volume Analysis applied to breast cancer**

*Dr. Angus B Gordon, Imperial College Healthcare Trust, UK*

|                                        |                                                                                                                                       |
|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| 11:50 - 12:15                          | DWIBS for Detecting Recurrence and Metastasis after Lung Cancer Surgery                                                               |
|                                        | <i>Prof. Katsuo Usuda, Kanazawa Medical University, Japan</i>                                                                         |
| 12:15 - 12:40                          | Mitochondrial Dysfunction in Neurodegenerative Diseases                                                                               |
|                                        | <i>Dr. Luo Xun , Wenzhou Medical University, China</i>                                                                                |
| 12:40 - 13:00                          | <i>Panel Discussion &amp; Q&amp;A</i>                                                                                                 |
| 13:00 - 14:00                          | <i>Lunch @ Restaurant</i>                                                                                                             |
| 14:00 - 14:30                          | <i>Keynote Presenters</i>                                                                                                             |
| 14:00 - 14:30                          | Beyond Burnout: Rethinking How We Protect the People Who Care for Others                                                              |
|                                        | <i>Dr. Simona Dobešová Cakirpaloglu, Palacký University Olomouc, Czech Republic</i>                                                   |
| Technical Session - II [14:30 - 18:30] |                                                                                                                                       |
| 14:30 - 14:55                          | Mobile Health Map and The Family Van                                                                                                  |
|                                        | <i>Director Mary Kathryn Fallon, Harvard Medical School, USA</i>                                                                      |
| 14:55 - 15:20                          | A Case Discussion of Multiple Severe Respiratory Arrests Following Lung Transplantation Secondary To Acquired Food Allergy From Donor |
|                                        | <i>Dr. Adam Eisenbraun, Nurse Practitioner at Mayo Clinic, USA</i>                                                                    |
| 15:20 - 15:45                          | The Comparison Of Biofire Biothreat Panel V2.5 Performance Between Filmarray 2.0 And Spotfire Systems                                 |
|                                        | <i>Dr. Marianne Kim, BioMerieux company, USA</i>                                                                                      |

|                          |                                                                                                                                                            |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 15:45 - 16:10            | Mammogram Adherence Among Filipino American Women                                                                                                          |
|                          | <i>Dr. Astrid D. Oviedo, University of North Carolina Pembroke, USA</i>                                                                                    |
| 16:10 - 16:30            | <i>Poster Presentations + Refreshment Break</i>                                                                                                            |
| Poster - 1               | Amazon Biodiversity, Nutritional Vulnerability and Human Capital: The ABIP Pilot Translational Research Initiative                                         |
|                          | <i>Dr. Walter Pereira, Inovattis Health Science, Brazil</i>                                                                                                |
| Poster - 2               | Supporting Family Caregivers Through the Transition to Residential Care: A CommunityBased Action Research Approach                                         |
|                          | <i>Prof. Marie-Michele Lord, Université du Québec à Trois-Rivières, Canada</i>                                                                             |
| Poster - 3               | Gut microbiota-derived indole sulfate protects against radiation-induced brain injury and preserves cognitive function via the AHR/OAT3/BBB signaling axis |
|                          | <i>Dr. Wenjun Zhu, Huazhong University of Science and Technology, China</i>                                                                                |
| Poster - 4               | Thyroid disorders and Thyroid Cancer                                                                                                                       |
|                          | <i>Mrs. Suzan Serrano, USA</i>                                                                                                                             |
| <i>Session Continues</i> |                                                                                                                                                            |
| 16:30 - 16:55            | When Prevention Becomes a Privilege: Who Gets the Opportunity to Be Healthy in America?                                                                    |
|                          | <i>Dr. Kymberly Williams, Gordon State College, USA</i>                                                                                                    |
| 16:55 - 17:20            | <i>Speaker slot available</i>                                                                                                                              |
| 17:20 - 17:45            | Early Sepsis Diagnostic Uncertainty in the ED: How Biomarker Limitations Drive Misclassification and Clinical Harm                                         |

|                                                          |                                                                                                                                                     |
|----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                          | <i>Prof. Anya Kalakota, University of South Florida, USA</i>                                                                                        |
| 17:45 - 18:10                                            | <b>Improved Diabetes Treatment Using Metallic Nanoporous Nanostructured Capsules</b>                                                                |
|                                                          | <i>Dr. Thomas J. Webster, Brown University, USA</i>                                                                                                 |
| 18:10 - 18:30                                            | <i>Panel Discussion, Q&amp;A &amp; Day 1 Wrap-up</i>                                                                                                |
| <b>Tentative Scientific Program - Day 2</b>              |                                                                                                                                                     |
| <b>October 30, 2026    10:00 - 18:00    Orlando, USA</b> |                                                                                                                                                     |
| <b>Technical Session - III [10:00 - 18:00]</b>           |                                                                                                                                                     |
| 10:00 - 10:25                                            | <b>Energy Levels Calculus for Development of Illnesses such as HPV Cancers, HIV, COVID-19, Nipah</b>                                                |
|                                                          | <i>Dr. Iulia Mitrica, Independent Researcher, Spain</i>                                                                                             |
| 10:25 - 10:50                                            | <b>Predictive Value of a Nomogram Model Based on Combined Clinical and Imaging Features for Cerebral Microbleeds in Mild Traumatic Brain Injury</b> |
|                                                          | <i>Prof. Yangxianchun, Wuhan Hanyang Hospital, China</i>                                                                                            |
| 10:50 - 11:15                                            | <b>The role of MRI in the diagnosis of a Urachal Mucinous Adenocarcinoma mimicking a gynaecological cyst: A Case Report</b>                         |
|                                                          | <i>Dr. Atharv Patil, Milton Keynes University Hospital, United Kingdom</i>                                                                          |
| 11:15 - 11:40                                            | <i>Speaker slot available</i>                                                                                                                       |
| 11:40 - 11:50                                            | <i>Refreshment Break</i>                                                                                                                            |

|               |                                                                                                                                                                                       |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 11:50 - 12:15 | Ultraviolet and infrared radiation in Australia: assessing the benefits, risks, and optimal exposure guidelines                                                                       |
|               | <i>Mrs. Kirti Sharma, Western Sydney University, Australia</i>                                                                                                                        |
| 12:15 - 12:40 | Autophagy Inducers in Cancer Treatment: Molecular Mechanisms and Therapeutic Potential                                                                                                |
|               | <i>Prof. Sushil Dagadu Patil, Adiwasi Seva Samittee's IIPT, India</i>                                                                                                                 |
| 12:40 - 13:05 | Beyond Remission: The Unspoken Reality of Cancer Survivorship                                                                                                                         |
