November 10-11, 2025 in Lisbon, Portugal Tentative Agenda DAY-1 (November 10) 09:00-09:30 Registrations 09:30-10:00 Opening Remarks Presentations Mediastinal lesion characterization and prognostication using diffusion MRI: from whole lesion to target zone with dynamic approach Johan Coolen, University Hospitals of Leuven, Belgium Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education 11:00-11:30 Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report			
DAY-1 (November 10) 99:00-09:30 Registrations 99:30-10:00 Opening Remarks Presentations Mediastinal lesion characterization and prognostication using diffusion MRI: from whole lesion to target zone with dynamic approach Johan Coolen, University Hospitals of Leuven, Belgium 10:30-11:00 Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education 11:30-11:50 Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-1 11:30-11:55 Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan 11:55-12:15 Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	5th International Conference on Oncology and Cancer Research		
DAY-1 (November 10) 09:00-09:30 Registrations 09:30-10:00 Opening Remarks Presentations Mediastinal lesion characterization and prognostication using diffusion MRI: from whole lesion to target zone with dynamic approach Johan Coolen, University Hospitals of Leuven, Belgium 10:30-11:00 Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education 11:00-11:30 Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-1 Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report			
09:30-10:00 Opening Remarks Presentations Mediastinal lesion characterization and prognostication using diffusion MRI: from whole lesion to target zone with dynamic approach Johan Coolen, University Hospitals of Leuven, Belgium Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education 11:00-11:30 Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report		Tentative Agenda	
Opening Remarks Presentations Mediastinal lesion characterization and prognostication using diffusion MRI: from whole lesion to target zone with dynamic approach Johan Coolen, University Hospitals of Leuven, Belgium Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan 11:55-12:15 Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal 12:15-12:40 Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	DAY-1 (November 10)		
Presentations Mediastinal lesion characterization and prognostication using diffusion MRI: from whole lesion to target zone with dynamic approach Johan Coolen, University Hospitals of Leuven, Belgium 10:30-11:00 Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education 11:00-11:30 Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I 11:30-11:55 Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	09:00-09:30	Registrations	
Mediastinal lesion characterization and prognostication using diffusion MRI: from whole lesion to target zone with dynamic approach Johan Coolen, University Hospitals of Leuven, Belgium 10:30-11:00 Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education 11:30-11:30 Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I 11:30-11:55 Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan 11:55-12:15 Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	09:30-10:00	Opening Remarks	
10:00-10:30 Johan Coolen, University Hospitals of Leuven, Belgium 10:30-11:00 Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK		Presentations	
Restriction of cancer metastasis - Translating gene discovery into clinical application Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	10:00-10:30		
Ulrike Stein, Charite and MDC, Germany Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I 11:30-11:55 Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan 11:55-12:15 Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report		Johan Coolen, University Hospitals of Leuven, Belgium	
Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I 11:30-11:55 Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	10:30-11:00	Restriction of cancer metastasis - Translating gene discovery into clinical application	
11:30-11:50 Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK Group Photo Refreshment Break Technical Session-I Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report		Ulrike Stein, Charite and MDC, Germany	
Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	11:00-11:30	Breaking the Silence in Immunotherapy : A Two-Cyled Podcast-led Quality Improvement Project for Immunotherapy Education	
Technical Session-I Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report		Anjali Rajkumar, University Hospitals Bristol and Weston NHS Foundation Trust, UK	
Technical Session-I Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	11:30-11:50	Group Photo	
Triple synchronous primary cancers comprising large cell neuroendocrine carcinoma of the lower uterine segment and endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	11.50-11.50	Refreshment Break	
endometrioid carcinomas of the uterine corpus and the right ovary-a rare combination: A case report Kaichiro Yamamoto, Ikoma City Hospital, Japan Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report		Technical Session-I	
11:55-12:15 Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	11:30-11:55		
Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report		Kaichiro Yamamoto, Ikoma City Hospital, Japan	
Sushmit Kafle, Pokhara University Teaching Hospital, Nepal Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	11:55-12:15	Ultrasonography Findings Of Testicular Tuberculosis In Nepalese Patients: A Case Series	
12:15-12:40		Sushmit Kafle, Pokhara University Teaching Hospital, Nepal	
	12:15-12:40	Deficiency of adenosine deaminase 2 leading to recurrent Hodgkin lymphoma: A case report	
		Anas Manhal Hussien, Hebron University, Palestine	

12:40-13:05	Chromosomal aberration analysis: Novel noninvasive techniques for early-stage cancer screening
	Gang Liu, Lanzhou University, China
13:05- 14:00	Lunch @ Restaurant
	Technical Session-II
14:00-14:25	In Vitro Assessment of Cryoablation Procedural Variables and a Novel Cryoprobe for the Treatment of Breast Cancer
	John M. Baust, CPSI Biotech, United States
14:25-14:50	Open abdomen and negative pressure wound therapy for acute peritonitis especially in the presence of anastomoses and ostomies
	Orestis Ioannidis, Aristotle University of Thessaloniki, Greece
14:50-15:15	Seeing the Unseen: IFI as a Game Changer in Breast-Conserving Surgery
	Navaneeth Ranjith, Western Health and Social Care Trust, UK
15:15-15:40	Splenic diffuse red pulp small B-cell lymphoma with overlapping clinical and immunophenotypic features with hairy cell leukaemia
	Mirette Hanna, RVH, Canada
15:40-16:00	Refreshment Break
16:00-16:25	Delivery of a virtually supervised exercise intervention for Hispanic and Latina breast cancer survivors: Lessons learned from the ROSA trial
	Christina M. Dieli-Conwright, Harvard Medical School, USA
16:25-16:50	Underfed and Overlooked: Malnutrition as a Predictor of Postoperative Complications in Gastric Surgery
	Navaneeth Ranjith, Western Health and Social Care Trust, UK
16:50-17:15	Basal Cell Carcinoma: Diagnosis, Management and Prevention
	P Umar Farooq Baba, SKIMS, India
	Day-1 Concludes
	Pannel Discussions
	DAY-2 (November 11)
	Day-2 Schedule will be updated soon.
	Note: This is a provisional agenda and may be subject to change. Only a few slots remain, to book your slot please contact cancercongress@urforum.org or +44 7404141173 ASAP
