

## LE-2 STATES OF MATTER

### LEARNING OBJECTIVES

- **Explain the arrangement of molecules and other properties of each state of matter. (Comprehending)**
- **Demonstrate the different processes like evaporation, melting, freezing, condensation that change the states of matter. (Applying)**
- **Explain the terms solute, solvent and solution with the help of experiment. (Applying)**

**ENTRY-CARD. Look around you. Find out atleast ten objects of SOLIDS, LIQUIDS AND GASES. List them in your note book**

SOLIDS	LIQUIDS	GASES

**VOCABULARY:( Write each word 2-times)**

**Matter, volume, compress, arrangement, packed, particles, melting, freezing, evaporation, condensation, dissolve, solute, solvent, solution**
